PROCUREMENT DIVISION WEEKLY REPORT FOR
PERIOD ENDING 26 JANUARY 1983

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred During the Preceding Week:

a. Image Understanding/Artificial Intelligence (IU/AI):

A request to contract for an image understanding/artificial intelligence testbed program was received by the Procurement Division. The testbed will be procured over a three year period at a cost of \$1.7 million. This testbed is expected to service the IU/AI programs through 1990. The system will have flexibility to allow evolving software and peripheral equipment to be installed, tested and experimented with in a classified environment. The testbed will remain in the research environment throughout its useful life and never take on an operational status. The Office of Research and Development (ORD) has no plans to interface this system to other Agency ADP equipment. It will function completely as a stand-alone research testbed. This request is scheduled for presentation to the Agency Contract Review Board (ACRB) on 15 February 1983.

b. Preliminary Evaluation Report for LIMS Development Effort: In response to a solicitation involving the software development of a Logistics Integrated Management System (LIMS) to support the Office of Logistics, two prospective contractors (Computer Sciences Corporation (CSC) and Booz-Allen & Hamilton) have submitted Cost-Plus-Award-Fee (CPAF) proposals to be considered for award. The LIMS Proposal Evaluation Teams (Cost and Technical) have completed a preliminary evaluation of the proposals and are scheduled to present their initial finding to the Source Selection Board (SSB) on 26 January 1983.
